- C –Dk. Green w/ Lt. Green Streaks (1/2 sq ft)
- D – Dk Green and Dk Amber Translucent (1/2 sq ft)
- E Amber and White Translucent (1/2 sq ft)

Materials

1 – 4 Prong Spider

Other Materials (not included in kit)

Consumables (copper foil, solder, flux, patina, wax, etc.)

Lamp base

Instructions

Create two panels from pattern marked Sides 1 & 3. Create two panels from pattern marked Sides 2 & 4.

Copper foil and solder each individual panel. Do not solder the two vertical edges where the panels will meet (will be done in the next step).

Tack solder the four panels together standing up. Side 1 panel is soldered to Side 2 panel, Side 2 to Side 3 and so on (in other words, the two designs are opposite each other). Solder from inside corner to inside corner. Fill the V-shape on the exterior with solder.

Cut the 4-prong spider to fit on the inside.

Solder the spider to the four corners of the lamp, one inch down from the top of the lamp.

Sides 1 & 3

Sides 2 & 4
